M2M DEVICES

Fast Mover Advantage

DEVICE – TRACK 1

- **NB-IoT /CATM1 chipset sensor integration**
 - Pre-study target architecture
 - Proof of concept product
 - Auto Provisioning ready

APPLICATION – TRACK 2

- **Proof of concept Data acquisitie**
 - Demo setup with a few sensor units and full connectiviteit
 - PoC Portal and data set handling and delivery at customer cloud location
- **Pilot field project with many sensors**
 - Real life implementation test (e.g. underground application, mass provisioning, battery life etc.)
 - Evaluation and adjustments for production series

Fast Mover Advantage

COMMERCIALS TRACK 1 & TRACK 2

- **Advice on NB-IoT/CATM1 chipset integration included**
- **Reduced IoT verification cost**
- **Reduced Proof of Concept cost**
- **No data cost in this period**
- **Influence development and product roadmap**

Not included in price and activities are :

- HW design and realisation of sensor with IoT chipsets
- External cost for IoT sensor verification
- On-site work (if applicable)
