

TelbaseIoT

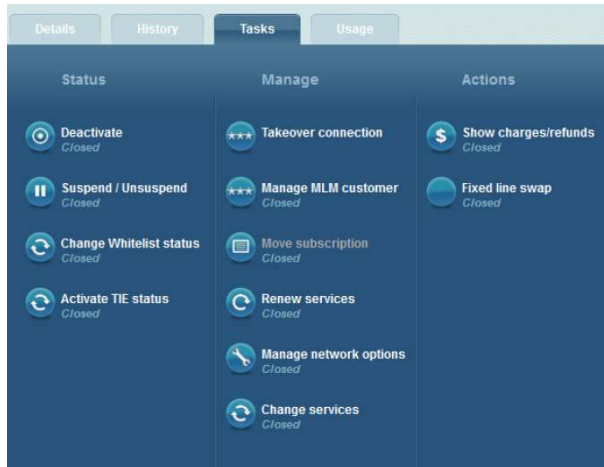

Flexible billing SaaS for IoT services

When deploying IoT based services, billing to clients may become complex due to the number of clients, client layers and portfolio of products and services. Telbase IoT is built specifically to handle that complexity so you can deploy market optimised products without the restrictions of a billing system. And Telbase IoT delivers more. Much more.

- ✓ Proven modular SaaS service
- ✓ Workflow oriented
- ✓ Built for complex services
- ✓ Supports multiple payment methods
- ✓ Data ownership remains at customer
- ✓ Multiple client layers support
- ✓ Customer care support
- ✓ CRM support
- ✓ Provisioning & activation
- ✓ Marketing automation support
- ✓ Direct and indirect distribution support
- ✓ SaaS; no infrastructure required, scalable

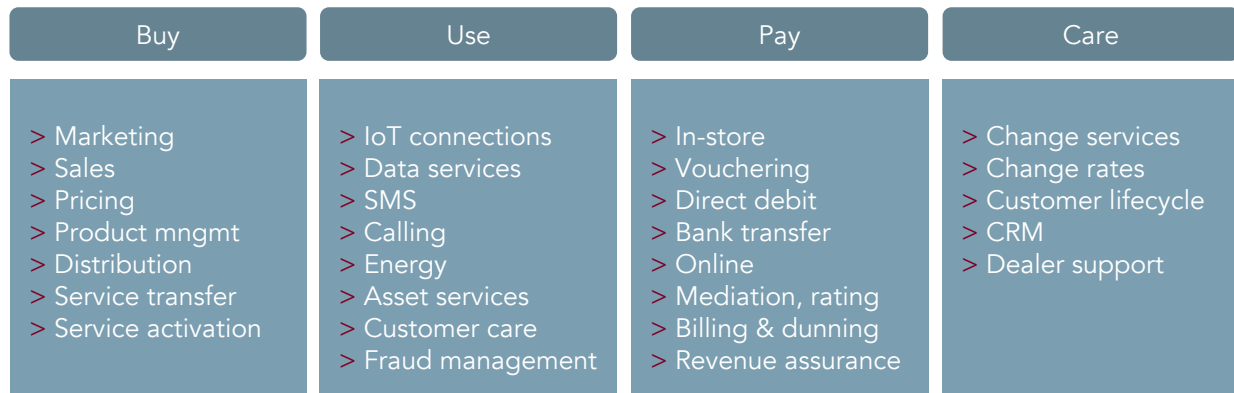

Telbase IoT is built on years of experience in the telecommunications industry and delivers a wide range of functionality to gain, support and bill customers in the IoT service area.

Frequently used processes by sales and support staff can be handled with one click for efficient operations.

Supports customer processes throughout the client lifecycle.

TelbaseIoT

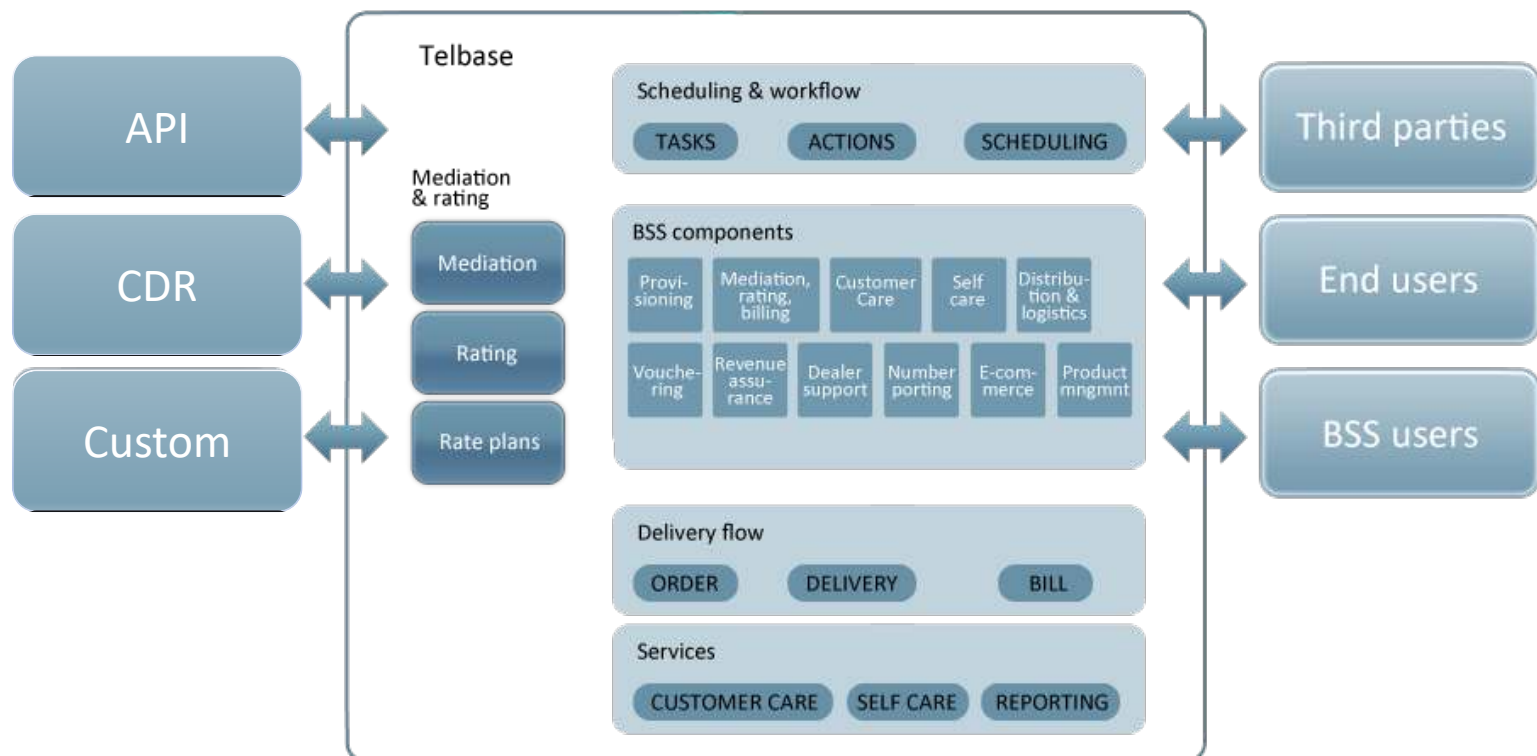

Sales CRM

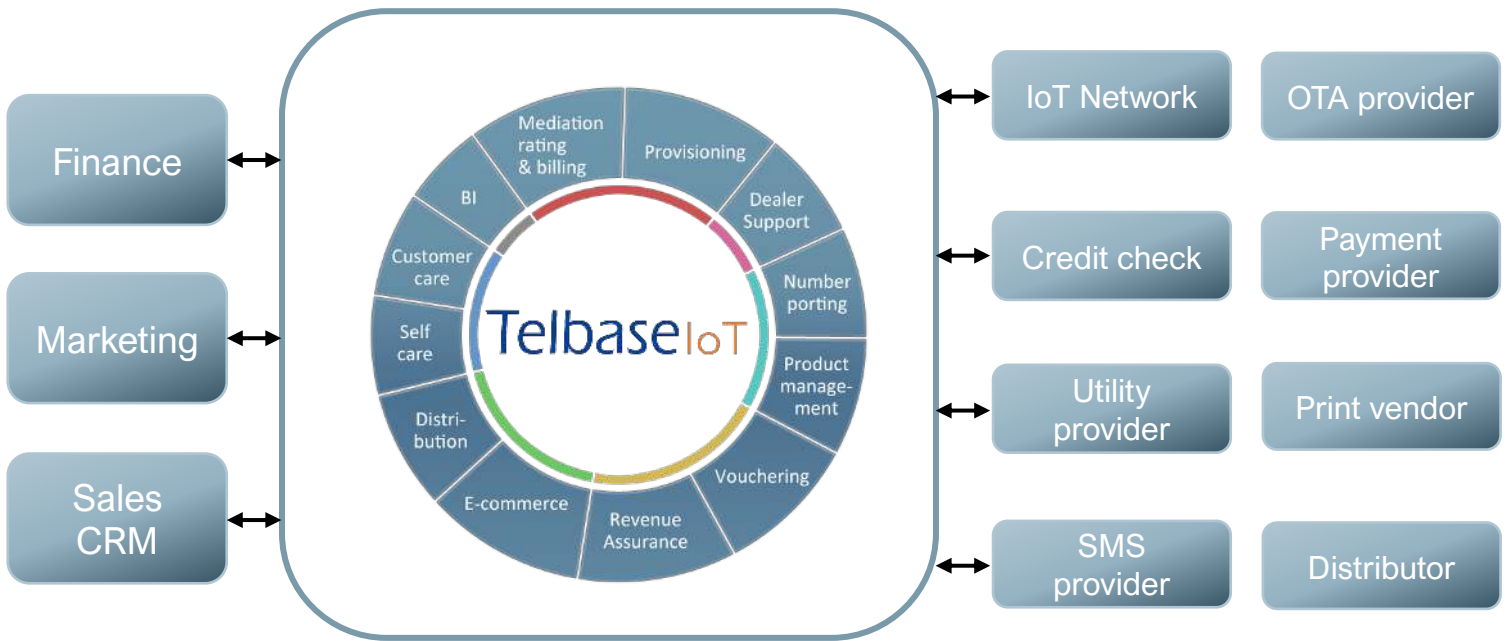

Provisioning and activation

Bookkeeping

Marketing automation
Chat functionality

Telbase IoT has a fully modular setup which allows for a low barrier start and gradual expansion.

Telbase IoT is built to seamlessly integrate with internal systems and processes as well as external supporting services.
